

# SWEET TASTE OF TORAH

This snack relates to this week's parsha. Please take these as suggestions and make necessary changes based on your individual dietary needs.

## Land Inheritance

Numbers 26:52-56

### Ingredients:

- Assorted candies
- Assorted dried fruit and nuts
- Template of tribes' land inheritance (provided in this lesson)

### Instructions:

Using the template provided in this lesson, make a snack representing the  $9\frac{1}{2}$  tribes on the west side of the Yarden (Jordan) and the  $2\frac{1}{2}$  tribes on the east. Use any types of small candies or chocolates such as *M&Ms*, *Sixlets*, *Jelly Bellies*, *Sweet Tarts*, *Lemon Drops*, *Junior Mints*, *Nerds*, chocolate non-perils, etc.

To indicate each tribe, place your different varieties of candies on the template. One candy type represents one tribe; so you would need 12 different candies. If desired, fill up the map with your snacks to represent each tribe's land color.

For a healthier option, you can also use different types of small, dried fruits such as raisins, cran-raisins, and assorted nuts or seeds to represent each tribe.
